Miroslaw Sroka 145 ALNWICK ROAD LEE LONDON SE12 9BX

Dear Sir or Madam

### Plan information request

Thank you for your request.

#### What we've done

We no longer complete individual questionnaires. Instead, we've looked at the various questionnaires we've received about transfers, and now provide answers to the most commonly asked questions in the attached summaries. The information is current as at the date of this letter but may change in the future.

We also enclose an illustration for the ages you've asked for. If you've not given us an age, the illustration will show what the planholder might receive on their planned retirement date.

If the planholder's age is within 12 months of their planned retirement date or the age you've asked for, we won't be able to give you projections. Instead, the illustration will show projections for the following year.

If you'd like a retirement quote, please contact us.

### What to do if you want more information

We've set up online access for you, so all you need to do is go to www.aegon.co.uk/login and find the information you want, for example, if you want to see the contribution history paid to the plan or contributions for specific pension input periods.

### **Pension transfer**

If the planholder wants to transfer:

- We can process transfers through the Origo Options transfer service, as long as the receiving provider is a member of the service.
- If the transfer can't be done through the Origo Options transfer service, please complete and return the enclosed transfer forms to us and attach the HM Revenue & Customs (HMRC) registration certificate for the receiving scheme which shows the Pension Scheme Tax Reference.

Before carrying out any transfers, we must carry out certain checks to make sure that we can send the transfer payment to the receiving scheme. We'll do this as quickly as we can, however we need all the relevant information before we can do this. So any delay in receiving this information may lead to a delay in completing the transfer or even declining the transfer request.

### More information on charges and rebates

### Total net charges paid

This shows the total net charges paid in the last 12 months. When the policy start date is less than 12 months ago, this shows the total net charges from the policy start date.

### Initial charge

Charge to cover the cost of commission being paid. This is deducted from the payments made to the plan before investment, rather than from the fund value.

### **Establishment charge**

Charge to cover the cost of commission being paid to an adviser. Taken from the plan fund value.

### **Explicit fund related commission**

This is a specific charge on the fund to pay for commission.

### **Annual management charge**

The AMC taken in the last 12 months is the yearly charge to cover our costs and to pay the fund manager for managing your funds. This will include any additional fund expenses or charges that may apply to certain funds.

### Paid-up charge

Yearly fee applied if the plan has been made paid-up because contributions have stopped.

### Plan Fee

This is a charge to cover administration of your plan. Depending on the type of plan you have it may

also be referred to as a policy charge or policy fee.

### Fund value rebate amount

Depending on the plan you have this is either a yearly rebate applied to the plan when the plan value is more than £50,000, or a monthly rebate applied to the plan when certain conditions are met. This is shown as a yearly amount above.

### Fund charge rebate amount

Depending on the plan you have this is either a yearly rebate applied to the plan, or a monthly rebate applied to the plan, shown as a yearly amount above.

# A breakdown of your plan values

### Your plan value at 10/02/2023

The value of investments can fall as well as rise and isn't guaranteed. You may get back less than the amount originally invested. See 'About these values' later in this section for more information.

	uni <b>ts</b> held	units held (pence)

### Total plan value at 10/02/2023

£22599.59

You can find information on fund performance on our website at www.aegon.co.uk/funds

### Your transfer value

### Total transfer value at 10/02/2023

£22,599.59

This is the amount you could transfer to another plan and includes a proportionate terminal bonus, fund bonus, loyalty bonus and/or a market value reduction, if applicable.

# About these values

### **Unit-linked funds**

If you have any payments invested in unit-linked funds, the benefits aren't guaranteed, and the value of investments can fall as well as rise. You may get back less than the amount originally invested.

### Your illustration - continued

What you might get back when you take your benefits

We've taken account of possible future inflation to give you an indication of how much your pension could be worth if it were payable today, as Inflation reduces the buying power of all savings and investments.

The amounts shown below give you an idea of what your pension could be worth in 'today's money' when you take your benefits. It's not a guarantee or promise of the amount of benefit you'll get.

This section shows what you might get back at age 65.

### Assuming no more contributions are paid into your plan

If your investment grows at	Low	Mid	High
Your fund value, after adjustment for inflation, at age 65 could be	£12,776.95	£22,466.85	£38,867.39
Giving you a yearly pension of	£421,29	£978.94	£2,159.53

For more information on the low, mid and high growth rates, please see 'Rates of growth we use in this illustration' later in this section.

### **About this illustration**

- The figures above are only examples and aren't guaranteed they're not
  minimum or maximum amounts. What you'll get back depends on how your
  investment grows, the effect of charges and how it's taxed. You may get
  back less than you invested.
- Your fund value when you take benefits could be more or less than this.
- Firms might use different rates to show how funds may be converted into pension income.
- Your pension income will depend on how your investment grows, the effect
  of product and investment charges, any consultancy charges and/or adviser
  charges, interest rates when you take your benefits and the cost of buying
  an annuity when your pension becomes payable.

### **Assumptions for this illustration**

### **About your pension**

- The amount of your pension will stay the same from when you start taking it.
- Your pension will be paid monthly in advance.
- Your pension will be paid to you for the rest of your life. It has a
  guaranteed period of five years. If you die before the end of the
  guaranteed period, we'll continue to pay your pension instalments for the
  remaining term.
- This illustration doesn't include provision for a spouse's pension.
- The figures above show the value of your pension in 'today's money'.
   They take account of how inflation will reduce the buying power of your pension fund when you come to buy your benefits. We've assumed an inflation rate of 2.00% a year when calculating this.

### Rates of growth we use in this illustration

We've adjusted the growth rates for inflation and we show these below.

All firms are required to carry out projections using growth rates that they consider appropriate for each asset class. As firms may have differing views, this means firms might not use the same growth rate for projections. Their charges may also vary. We calculate the mid growth rate by taking the growth rates for the assets in the fund(s) you've chosen, cap any at 5.00% (if over 5.00%) and weight them according to the proportion of each asset held (the 'weighted average'). The growth rate for each fund is based on our view of potential long-term returns of the main asset classes (equities, property, corporate bonds, government bonds and cash) and will vary depending on the fund(s). We call this the Economic Growth Rate. This rate is not guaranteed.

The growth rate shown below, for each fund, is after adjustment for inflation but before rounding down and capping of the maximum growth rate (if applicable).

Fund	Low rate	Mid rate	High rate
Univ Lifestyle Col	-2.22%	0.71%	3.65%

 We've used the following weighted average growth rates for the projections of the existing fund holding:

```
Low -2.45%, Mid 0.49%, High 3.43%
```

 We've used the following weighted average growth rates for the projections of future contributions:

```
Low -2.45%, Mid 0.49%, High 3.43%
```

- Where the growth rates used for projecting are over 5.00% we're required to cap these at 5.00%, before we make the adjustment for inflation.
- If the growth rate we've used is:
  - the same as the rate of inflation this reduces the growth rate, after making an allowance for inflation, to 0%;
  - less than the rate of inflation, this produces a negative growth rate after making an allowance for inflation.
