Benefits are accounted for in the period in which the member notifies the Trustees of his decision on the type or amount of benefit to be taken or, if there is no member choice, they are accounted for on the date of retirement or leaving.

Opt-outs are accounted for when the Scheme is notified of the opt-out.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 5 APRIL 2017

9. FAIR VALUE DETERMINATION

The fair value of financial instruments has been estimated using the following fair value hierarchy:

Category (a)	The quoted price for an identical asset in an active market at the reporting date.
Category (b)	When quoted prices are unavailable, the price of a recent transaction for an identical asset adjusted if necessary.
Category (c)	Where a quoted price is not available and recent transactions of an identical asset on their own are not a good estimate of fair value, the fair value is determined by using a valuation technique that uses:
(c) (i)	observable market data; or
(c) (ii)	non-observable data.

The scheme's investment assets have been fair valued using the above hierarchy categories as follows:

	Category (a) £	Category (b) £	Category (c) (i) £	Category (c) (ii) £	Total £

10. INVESTMENT RISK DISCLOSURES

The Trustees determine their investment strategy after taking advice from a professional investment adviser. The Scheme has exposure to these risks because of the investments it makes in following the investment strategy set out below. The Trustees manage investment risks, including credit risk and market risk, within agreed risk limits which are set taking into account the Scheme's strategic investment objectives. These investment objectives and risk limits are implemented through the investment management agreements in place with the Scheme's investment managers and monitored by the Trustees by regular reviews of the investment portfolio.

Credit risk

Credit risk: this is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Currency risk

Currency risk: this is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in foreign exchange rates.
