Hi

I have looked further into this and

Total fund value as at 30/11/08 was £597,432.10 – member took PCLS of £65,000 so effectively crystallised £260,000 leaving £337,432.10 uncrystallised.

Total fund value as at 01/11/13 was £510,049.64 - split crystallised £ 159,974.10 and uncrystallised £355,075.54 which was then fully crystallised.

LTA utilised therefore:

30/11/08 £ 65,000.00 PCLS - SLA crystallised 3.93%

30/11/08 £195,000.00 Drawdown fund - SLA crystallised 11.81%

01/11/13 £ 88,768.88 PCLS - SLA crystallised 5.91%

01/11/13 £266,306.66 Drawdown fund - SLA crystallised 17.75%

Apologies for the previous confusion.

Regards

John Webster
