**NOTES TO THE FINANCIAL STATEMENTS
FOR THE YEAR ENDED 26 DECEMBER 2019**

1. ACCOUNTING POLICIES

Basis of preparing the financial statements

The financial statements have been prepared in accordance with the Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and the guidance set out in the Statement of Recommended Practice, Financial Reports of Pension Schemes (revised November 2014).

Contributions

Employee contributions, including AVCs, are accounted for by the Trustees when they are deducted from pay by the Employer, except for the first contribution due where the employee has been auto-enrolled by the Employer, in which case it is accounted for when received by the scheme.

Employer normal contributions that are expressed as a rate of salary are accounted for on the same basis as employee contributions, in accordance with the Schedule of Contributions in force during the year.

Employer augmentation contributions are accounted for in accordance with the agreement under which they are payable.

Employer deficit funding contributions are accounted for on the due dates on which they are payable under the Schedule of Contributions or on receipt if earlier with the agreement of the Employer and the Trustees.

Employer S75 debt contributions are accounted for when a reasonable estimate of the amount due can be determined.

Payments to members

Pensions in payment are accounted for in the period to which they relate.

Benefits are accounted for in the period in which the member notifies the Trustees of his decision on the type or amount of benefit to be taken or, if there is no member choice, they are accounted for on the date of retirement or leaving.

Opt-outs are accounted for when the Scheme is notified of the opt-out.

Individual transfers in and out of the Scheme are accounted for when member liability is accepted or discharged which is normally when the transfer amount is paid or received.

Group transfers

Group transfers are accounted for in accordance with the terms of the transfer agreement.

Expenses

Expenses are accounted for on an accruals basis.

Investment income

Dividends from equities are accounted for on the ex-dividend date.

Income from bonds is accounted for on an accruals basis and includes interest bought and sold on investment purchases and sales.

Rental income is accounted for on an accruals basis.

Income from pooled investment vehicles is accounted for when declared by the fund manager.

Receipts from annuity policies are accounted for as investment income on an accruals basis.

1. ACCOUNTING POLICIES - continued

Change in market value of investments

The change in market value of investments during the year comprises all increases and decreases in the market value of investments held at any time during the year, including profits and losses realised on sales of investments during the year.

Investments

The Fund measures its investments in properties, as well as its investments in financial instruments, such as equities, fixed interest securities, other interest bearing investments and units in pooled investment vehicles at fair value at each reporting date.

Investment property is held for long-term rental yields or for capital appreciation or both, and is not occupied by the Fund. Property is valued at market value by external independent valuers with recognised and relevant professional qualifications.

Foreign currencies

The scheme functional and presentation currency is pounds sterling. Monetary items denominated in foreign currency are translated into sterling using the closing exchange rates at the scheme year-end. Foreign currency transactions are recorded in sterling at the spot exchange at the date of the transaction.

11. FAIR VALUE DETERMINATION

The fair value of financial instruments has been estimated using the following fair value hierarchy:

Level 1	The unadjusted quote price in an active market for identical assets or liabilities that the entity can access at the measurement date.
Level 2	Inputs other than quoted prices included with Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
Level 3	Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The scheme's investment assets have been fair valued using the above hierarchy levels as follows:

26 December 2019				
	Level 1 £	Level 2 £	Level 3 £	Total £
Property	-	1,321,917	-	1,321,917

12. INVESTMENT RISK DISCLOSURES

FRS 102 requires the disclosure of information in relation to certain investment risks. These risks are set out by FRS 102 as follows:

Credit risk: this is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation.

Market risk: this comprises currency risk, interest rate risk and other price risk.

" Currency risk: this is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in foreign exchange rates.

" Interest rate risk: this is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market interest rates.

" Other price risk: this is the risk that the fair value or future cash flows of a financial asset will fluctuate because of changes in market prices (other than those arising from interest rate risk or currency risk), whether those changes are caused by factors specific to the individual financial instrument or its issuer, or factors affecting all similar financial instruments traded in the market.

The Trustees determine their investment strategy after taking advice from a professional investment advisor. The Scheme has exposure to these risks because of the investments it makes to implement its investment strategy described in the Trustees' Report. The Trustees manage investment risks, including credit risk and market risk, within agreed risk limits which are set taking into account the Scheme's strategic investment objectives. These investment objectives and risk limits are implemented through the investment management agreements in place with the Scheme's investment managers and monitored by the Trustees by regular reviews of the investment portfolio.

Further information on the Trustees' approach to risk management and the Scheme's exposures to credit and market risks are set out below. This does not include legacy insurance policies nor AVC investments as these are not considered significant in relation to the overall investments of the Scheme.

Investment strategy

a) Credit risk

The scheme is not subject to either Direct or In-Direct credit risk as the Investments are not held within financial instruments.

b) Market risk

The scheme is not subject to Currency or Interest Rate risk as there is no exposure to foreign currency nor are there any assets, which are held with any connection to Interest rates.

There is a risk to both fair values and future cash flows due to the nature of the investment asset i.e. property. The fair values are always subject to the potential risk of impairment and the overall condition of the property portfolio. This is mitigated by the routine maintenance upon the property, and the conditions within the tenant's leases i.e. fully repairing.

The risk to the future cash flows is condition of the property as to whether this is sufficient to offer to potential tenants, this is covered by the above paragraph. The other indirect risk to the state of the rental market, and the trustees endeavour to offer the property at commercially competitive rates to try and ensure full occupancy.
