1. How your pot has changed in the last 12 months

£ 3250

This is how much you have paid in this scheme year

£ 3250

This is how much your employer has added in this scheme year

£ 37,921

This is the net change in underlying assets from the scheme.

£211,997

This is the value of your pension pot on 31 March 2021

2. How much money could you get when you retire

Retirement Pot
£237,000

£ 59,250

Tax Free Lump Sum

You will have the option to take 25% of your retirement fund tax free, subject to an overall lifetime allowance cap.

£ 14,100 p.a.

After the tax free lump sum has been paid you will receive an income from the scheme.

You can choose at the date of your retirement various ways to take your pension and this illustration assumes that you purchase an annuity*.

* An annuity secures an income for life from an insurance company. For illustration purposes we are required to adopt this assumption basis. The pension is deemed to be non-increasing and no provision has been made for an income payable to a spouse/dependant on death.

3. Your pension plan at a glance

Your pension plan is a small self administered scheme

You pay in
£ 3250/p.a.

Your employer contributes
£ 3250/p.a.

Your pension is currently invested in cash, funds and property

84 % in Property **15 %** in Funds **1%** in Cash

Your beneficiaries

If you die before you retire, your beneficiaries will receive:

£211,997

The investment performance of the fund will dictate the growth in your money.

4. What can you do to plan better your retirement

To increase your income in retirement, depending on your personal situation, you may be able to:

Increase your contribution

Choose a higher retirement age

Get a personal financial solution from our financial advisor

Look at transferring old pensions to this scheme

5. Other important information

Your retirement forecast is based on certain assumptions which are as follows:

We assume investment growth at 5% p.a.

We assume inflation at 3% p.a.

We assume a scheme expense ratio of 1% p.a.

We assume funding rate on the current contribution basis in line with inflation.
